WORK EXPERIENCE

Frontend developer

Freelance

11/2021 - 03/2022

- Create SPA with React, React-redux, TypeScript; Cover code with unit tests; Optimize code (React.memo, useCallback).
- Design app architecture (Model-View-Presenter pattern, Flux pattern). Create API (REST API, Postman, Axios); Create reducers and thunks; Handle errors.
- Add and style components (Material UI); Implement responsive & adaptive design (SASS).
- Debounce the search; Implement routing (React-router-dom v6); Create and validate auth forms (Formik); Create CRM tables; Implement filtration.

EDUCATION

Frontend developer

IT-INCUBATOR (2021-2022)

React, Redux, TypeScript

- <https://it-incubator.io>

SKILLS

TypeScript

React

Redux

JS/ES6+

REST API

Axios

Postman

Formik

Yarn

TDD

Jest unit/snapshot testing

Storybook

Git

Semantic commits

HTML5

CSS3

SASS

Figma

Responsive/Adaptive Design

Material-UI

Prettier

React-router-dom

Jira

React hooks

React Class Components

Redux-thunk

Redux Toolkit

Flux pattern

Model-view-presenter pattern

Chrome DevTools

WHY ME?

I have C1+ English level (both oral and written), strong soft skills and well experienced in working and communicating in a team.

I create SPA with React/Redux/TypeScript and cover the code with easy-to-read tests. I plan to improve my React skills, would like to also learn Angular or Vue frameworks and get some Node.js basics.

Experienced in using Jira, semantic Git commits and daily scrum meetings. I have a vivid personality and I'm really easy-going. I believe I can be a valuable asset to your team :)
