WHY ME?

I have C1+ English level (both oral and written), good listening skills and self-control. I'm also well experienced in working and communicating in a team. I've created some SPA with React/Redux/TypeScript and other production libs.

To become a developer was my childhood dream, so I worked hard to get it and now I'm eager to work even harder and learn more to grow as a professional.

I have a vivid personality and I'm really easy-going. I believe I can be a valuable asset to your team :)
