WHY ME?

I have C1+ English level (both oral and written), strong soft skills and well experienced in working and communicating in a team.

I've created some SPA with React/Redux/TypeScript and other production libs. I got a skill to write smooth and easy-to-read unit tests.

To become a developer was my childhood dream, so I worked hard to get it and now I'm eager to learn more to grow as a professional. I have a vivid personality and I'm really easy-going. I believe I can be a valuable asset to your team :)
