WORK EXPERIENCE

Frontend developer (part-time)
2021-present

- Create SPA with React, React-redux, TypeScript; Cover code with unit tests; Optimize code (React.memo, useCallback).
- Design app architecture (Model-View-Presenter pattern, Flux pattern). Create API (REST API, Postman, Axios); Create reducers and thunks; Handle errors. Fix bugs.
- Add and style components (Material UI); Implement responsive & adaptive design (SASS).
- Debounce the search; Implement routing (React-router-dom v6); Create and validate auth forms (Formik); Create CRM tables; Implement filtration.

GitHub code

- TypeScript, React, Redux, React hooks, Formik, Storybook, Material UI, REST API, Axios, Postman, Jest unit/snapshot integration tests

Teacher of English (full-time)
International House Minsk

2018 - 2022

EDUCATION

Frontend developer
IT-INCUBATOR (React, Redux, TypeScript/JS)

2021 - 2022

Teacher of English
Minsk State Linguistic University

2014 - 2019

SKILLS

React   Redux   TypeScript   JS/ES6+

Redux Toolkit   Formik   Storybook   Axios

Redux-thunk   React-router-dom   Material-UI

Postman   REST API   TDD   CI/CD

Jest unit/snapshot testing   Jira   Git

Figma   HTML5   SASS   CSS3

Semantic commits   React hooks   Prettier

React Class Components   Flux pattern   Yarn

Responsive/Adaptive Design   Chrome DevTools

Model–view–presenter pattern   Debugger

WHY ME?

I create SPA with React/Redux/TypeScript and cover the code with easy-to-read tests. Currently I am improving my React skills and planning to learn Angular to broaden my frontend expertise.

I have C1+ English level (both oral and written), strong soft skills and I am well experienced in working and communicating in a team.

I read some chapters of Clean code by R.Martin and from time to time solve some tricky tasks on Codewars. ⌁

Experienced in using Jira, semantic Git commits and daily scrum meetings. I have a vivid personality and I am really easy-going. I believe I can be a valuable asset to your team :)
